- A. red hat hacker
- B. white hat hacker
- C. network sniffer
- D. man-in-the-middle

**ANSWER: D**

## QUESTION NO: 8 - (HOTSPOT)

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. Each correct selection is worth one point.

Hot Area:

Answer Area

By using NAP, administrators can place non-compliant computers onto restricted networks.

Yes

No

All computers that are not in compliance with NAP policies require manual intervention to be brought into compliance.

NAP can enforce that client computers are running a firewall.

**ANSWER:**

## Answer Area

By using NAP, administrators can place non-compliant computers onto restricted networks.

Yes

No

All computers that are not in compliance with NAP policies require manual intervention to be brought into compliance.

NAP can enforce that client computers are running a firewall.

## Explanation:

### QUESTION NO: 9

The Active Directory controls, enforces, and assigns security policies and access rights for all users.

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

- A. NTFS permissions
- B. User Account Control
- C. Registry
- D. No change is needed

**ANSWER: D**

### QUESTION NO: 10 - (DRAG DROP)

#### DRAG DROP

Match the authentication protocol with its description.

Instructions: To answer, drag the appropriate authentication protocol from the column on the left to its description on the right. Each authentication protocol may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

## Select and Place:

### Authentication Protocols

SMB

NTLM

NetBIOS

EAP

Kerberos

### Answer Area

an authentication protocol used by Windows stand-alone systems

an authentication protocol widely used in 802.11 environments

a strong authentication protocol preferred by Windows Server 2012 R2

protocol

protocol

protocol

## ANSWER:

### Authentication Protocols

SMB

NTLM

NetBIOS

EAP

Kerberos

### Answer Area

an authentication protocol used by Windows stand-alone systems

an authentication protocol widely used in 802.11 environments

a strong authentication protocol preferred by Windows Server 2012 R2

NTLM
