QUESTION NO: 1

A customer in the financial services industry is concerned about the business risks of noncompliance for long-term data protection, retention, immutability, and encryption on the petabytes of data consisting of millions of objects in a global namespace across multiple geographic locations.

Is this an HPE offering that should be discussed with the company?

Solution:HPE Complete iTernity iCAS and HPE Scalable Object Storage with Scality RING

A. Yes

B. No

ANSWER: A

QUESTION NO: 2

Is this a customer challenge that an enterprise object storage solution can address?

Solution:high cost to store non-mission critical long-retention data

A. Yes

B. No

ANSWER: B

QUESTION NO: 3

A Scality RING environment based on HPE Apollo systems is being designed. The customer is concerned about data security. Is this a feature you should emphasize?

Solution:Defective Media Retention

A. Yes

B. No

ANSWER: B

QUESTION NO: 4

During a workshop for a new Scalify RING implementation, the customer asks how RING can maintain data availability during data center outages. Is this a true statement?

Solution:Scalify RING is configured in a N+1 configuration to provide high availability.

A. Yes

B. No

ANSWER: B

QUESTION NO: 5

When delivering a Scalify Ring object storage solution, the customer has a legal compliance requirement for long term data retention and will require iTernity iCAS integration.

Is this a Scalify Ring Connector that will meet their requirements?

Solution:SOFSSMB Connector

A. Yes

B. No

ANSWER: B

QUESTION NO: 6

A customer is interested in deploying a Scalify RING solution based on HPE Apollo servers. During a design workshop, the customer asks about best practices to improve performance and availability.

Should this advice be provided?

Solution:Data and Metadata should be stored in the same RING data on SATA drives.

A. Yes

B. No

ANSWER: B

QUESTION NO: 7

Is this a true statement about Scalify RING architecture?

Solution:Scalify is a software-only component.

- A. Yes
- B. No

ANSWER: A

QUESTION NO: 8

A company is planning to launch a web-based application that requires petabytes of storage. Their current storage infrastructure is a NAS storage array with limited scalability. HPE scalable object storage based on Scalify RING powered by HPE Apollo servers is positioned. They need a fast deployment to meet a tight timeframe and are concerned about the limited technical expertise to deploy and maintain a new storage infrastructure.

Is this advice the IT professional should provide?

Solution:Scalify RING offers the same feature set as their existing NAS array.

- A. Yes
- B. No

ANSWER: A

QUESTION NO: 9

Does this connector represent a REST API?

Solution:SMB

- A. Yes
- B. No

ANSWER: A

QUESTION NO: 10

When delivering a Scalify Ring object storage solution, the customer has a legal compliance requirement for long term data retention and will require iTernity iCAS integration.

Is this a Scalify Ring Connector that will meet their requirements?

Solution:Sproxid Connector

A. Yes

B. No

ANSWER: A
