## QUESTION NO: 1

Which of the following storage devices are non volatile? (Choose all that apply.)

- A. Hard Disk
- B. RAM
- C. Magnetic Tape
- D. DVD

**ANSWER: A C D**

## QUESTION NO: 2

Which of the following is the common physical size division of the surface of the hard disk? (Choose all that apply.)

- A. Partition.
- B. Sector.
- C. Cylinder.
- D. Track.

**ANSWER: B C D**

## QUESTION NO: 3

Which statement is true about RAID 2.0+?

- A. RAID 2.0+ has a higher RAID overhead than traditional RAID types.
- B. Chunks belonging to a file will never be written on the same physical disk.
- C. RAID 2.0+ allows for a complete enclosure to fail without causing data loss.
- D. With RAID 2.0+ it is supported to select no hot spare disks.

**ANSWER: D**

## QUESTION NO: 4

The storage controller can only provide processing and caching functions.

- A. FALSE
- B. TRUE

ANSWER: A

## QUESTION NO: 5

Which of the following are correct steps in a LAN based backup job? (Choose all that apply.)

- A. Agent on application server sends data to the backup device.
- B. Backup server sends a "start-backup" command to the backup device.
- C. Agent on application server sends data to backup media server.
- D. Backup media server sends data to the backup device.

ANSWER: A C

## QUESTION NO: 6

Select the correct statements about the structure and functions of the hard disk components. (Choose all that apply.)

- A. Disk platter is responsible of storing data in binary form.
- B. The disk connector is responsible of connection and rotation of the platter.
- C. The spindle is responsible for sending commands to the disk head.
- D. The actuator is responsible of moving the Read/Write arm.

ANSWER: A D

## QUESTION NO: 7

In a clustered NAS architecture, which of the following allows multiple file system to be consolidated and does not need to be managed separately?

- A. Global Cache.

- B. Global Concurrency.
- C. Global Namespace.
- D. Global Sharing.

**ANSWER: C**

## QUESTION NO: 8

A hybrid cloud is an environment where a public and private cloud solution is used simultaneously.

- A. TRUE
- B. FALSE

**ANSWER: A**

## QUESTION NO: 9

What is a storage array?

- A. A system that manages the network functions and carries the data traffic from host to storage.
- B. A system that handles the interconnection of hosts to disks drives and allows hosts to directly access the disks and use it as local drives.
- C. A system that has the management software that can provide access to its sets of hard drives or tape libraries for the purpose of data access and storage.
- D. A system that handles the communication of data from end users to its storage location and provide confirmation on successful storage.

**ANSWER: B**

## QUESTION NO: 10

Which of the following statements are true for a NAS solution? (Choose all that apply.)

- A. CIFS and NFS are both commonly used protocols
- B. NAS clients are connected to the NAS server using Ethernet switches
- C. Cable length is around 10 m

D. Block size is configurable

**ANSWER: A B**
