## Topic Break Down

Topic	No. of Questions
Topic 1, Installing the Components of a XenMobile 10 Enterprise Solution	18
Topic 2, Designing a XenMobile 10 Enterprise Solution	20
Topic 3, Configuring and Integrating the Components of a XenMobile 10 Enterprise Solution	38
Topic 4, Managing and Maintaining the Components of a XenMobile 10 Enterprise Solution	42
<b>Total</b>	<b>118</b>

## QUESTION NO: 1

A Citrix Engineer integrated a XenMobile Server with StoreFront and now users are unable to enumerate any of their XenApp applications.

Which step must the engineer take to resolve this issue?

- A. Re-enter the correct relative path from the StoreFront services site on the XenMobile Server.
- B. Wrap Receiver with the MDX Toolkit and push the client to the device.
- C. Terminate active ICA sessions on the NetScaler.
- D. Add the XenMobile Server to the list of Delivery Controllers on the StoreFront Server.

**ANSWER: A**

## QUESTION NO: 2

Which two components are required in order for a Citrix Engineer to use the MDX Toolkit to wrap Android applications for production use? (Choose two.)

- A. Command-line tools
- B. Enterprise certificate from Symantec
- C. Android Developer Tools and Android SDK
- D. Android Just-in-Time Compiler
- E. A keystore certificate

**ANSWER: C E**

## QUESTION NO: 3

In which two ways could a Citrix Engineer configure User Provisioning to ShareFile within the XenMobile Console? (Choose two.)

- A. Configure the SSO section in the ShareFile website.
- B. Configure the ShareFile section in the XenMobile Console.
- C. Configure the ShareFile\_SAML Web/SaaS application.

D. Configure the location of the ShareFile public application store link.

**ANSWER: B C**

## QUESTION NO: 4

After a successful Android device enrollment through a NetScaler load balancer, the device was immediately selectively wiped.

Which two scenarios could be the cause of this selective wipe? (Choose two.)

- A. All of the NetScaler Universal Access Licenses have been allocated.
- B. The NetScaler port 443 virtual server did NOT have the XenMobile Devices or Root certificate bound.
- C. The NetScaler port 8443 virtual server did NOT have the XenMobile Devices or Root certificate bound.
- D. The NetScaler virtual server was re-encrypting back to the XenMobile Server over port 443.

**ANSWER: B D**

## QUESTION NO: 5

What are two scenarios in which a Citrix Engineer must configure Mobile Service Provider (MSP) for XenMobile Mail Manager? (Choose two.)

- A. To query unmanaged ActiveSync devices
- B. For BES 4 and BES 5 integration
- C. To control ActiveSync access for unmanaged devices
- D. For BES 10 integration

**ANSWER: A B**

## QUESTION NO: 6

A Citrix Engineer installed XenMobile Mail Manager and needs to ensure that ActiveSync clients are quarantined if they are NOT enrolled in the XenMobile Server.

Which Default Rule should the engineer choose in this scenario?

- A. Allow
- B. Block

- C. Unchanged
- D. Quarantine

**ANSWER: C**

## QUESTION NO: 7

A Citrix Engineer must delegate enrollment invitation management to Level 1 administrators.

What should the engineer do to accomplish this objective?

- A. Configure AAA groups on the NetScaler Gateway; allow only this group to access the console over port 4443.
- B. Create a local group on the XenMobile Server; allow only Level 1 administrators access to it.
- C. Configure a Delivery Group within the XenMobile Server; deploy the security policies only to the dedicated group of Level 1 administrators.
- D. Configure Role-based Access Control (RBAC); assign only the desired permissions to the Active Directory group where the Level 1 administrators reside.

**ANSWER: D**

## QUESTION NO: 8

Which XenMobile deployment option would pose the greatest security risk?

- A. SSL Bridge at the NetScaler load balancing tier with the XenMobile Server in the Demilitarized Zone (DMZ).
- B. SSL Bridge at the NetScaler load balancing tier with the XenMobile Server on the internal network segment.
- C. SSL Offload at the NetScaler load balancing tier with the XenMobile Server in the Demilitarized Zone (DMZ).
- D. SSL Offload at the NetScaler load balancing tier with the XenMobile Server on the internal network segment.

**ANSWER: B**

## QUESTION NO: 9

Which two additional steps must a Citrix Engineer take to complete a XenMobile cluster configuration after adding a secondary node to an existing production cluster? (Choose two.)

- A. Add and bind the load-balancing service to the load-balancing virtual servers.
- B. Add the new node to the XenMobile Server database.

- C. Add the new node as an STA to the NetScaler Gateway configuration.
- D. Add the new node as a Delivery Controller within StoreFront.

**ANSWER: A C**

## QUESTION NO: 10

What happens if a Citrix Engineer allows an Apple Developer certificate to expire?

- A. iOS MDX applications fail to launch.
- B. Associated Apple Unique Device Identifiers (UDIDs) must be re-entered within the Apple Developer Program portal.
- C. iOS device enrollment fails to occur.
- D. Apple Push Notification service (APNs) notifications fail to occur.

**ANSWER: A**
