QUESTION NO: 1

You have an Exchange Online tenant.

You need to ensure that users in your company's finance department can select email messages that will be deleted automatically one year later. The solution must apply only to the finance department users.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Publish a label to the finance department.
- B. For each mailbox in the finance department, configure Message Delivery Restrictions.
- C. For each mailbox in the finance department configure the retention policy settings.
- D. Create a label that has a retention setting of one year.
- E. Create a data loss prevention (DLP) policy that uses the sensitive information type.

ANSWER: A D

QUESTION NO: 2 - (DRAG DROP)

DRAG DROP

You have a Microsoft Exchange Server 2019 organization.

Two Edge Transport servers provide email hygiene.

You configure anti-spam filters to redirect email messages identified as spam to a quarantine mailbox.

You open the quarantine mailbox in Microsoft Outlook 2019 and discover that the from field of all quarantined messages shows the postmaster address.

You need to ensure that the quarantined messages can be sorted by using the original sender address.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

| Actions | Answer Area |
|--|-------------|
| Create a new Outlook form in Notepad. | |
| Edit the view in Outlook to include the required columns | |
| Install a form in Outlook. | |
| Run the Set-ContentFilterConfig cmdlet and specify the -OutlookEmailPostmarkValidationEnabled parameter. | |
| Edit the IPM.Note form in Outlook. | |

ANSWER:

| Actions | Answer Area |
|--|--|
| Create a new Outlook form in Notepad. | Create a new Outlook form in Notepad. |
| Edit the view in Outlook to include the required columns | Install a form in Outlook. |
| Install a form in Outlook. | Edit the view in Outlook to include the required columns |
| Run the Set-ContentFilterConfig cmdlet and specify the -OutlookEmailPostmarkValidationEnabled parameter. | |
| Edit the IPM.Note form in Outlook. | |

QUESTION NO: 3 - (DRAG DROP)

DRAG DROP

You have a Microsoft Exchange Server 2019 organization.

You need to identify which accounts in Active Directory are assigned permissions to dismount mailbox databases.

How should you complete the command? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Values

- Get-ManagementRole
- Get-ManagementRoleAssignment
- Get-ManagementRoleEntry
- Get-ManagementScope

Answer Area

```
$Perms = [ ] -Cmdlet Dismount-Database  
$Perms | foreach { [ ] -Role $_.Name -Delegating $false |  
Format-Table -Auto Role,RoleAssigneeType,RoleAssigneeName}
```

ANSWER:

Values

- Get-ManagementRole
- Get-ManagementRoleAssignment
- Get-ManagementRoleEntry
- Get-ManagementScope

Answer Area

```
$Perms = Get-ManagementRoleEntry -Cmdlet Dismount-Database  
$Perms | foreach { Get-ManagementRoleAssignment -Role $_.Name -Delegating $false |  
Format-Table -Auto Role,RoleAssigneeType,RoleAssigneeName}
```

QUESTION NO: 4 - (HOTSPOT)

HOTSPOT

You have a Microsoft Exchange Server 2019 organization.

You have the Address Book Policies (ABP) and address lists in the following table.

| Name | Global address list | Offline address book | Address list |
|------|---------------------|------------------------------|--------------|
| ABP1 | GAL_1 | OAB_1 | List 1 |
| ABP2 | GAL_2 | Default Offline Address Book | List 2 |

You have the users in the following table.

| Name | Global address list | Address List |
|-------|---------------------|--------------|
| User1 | GAL_1 | List 1 |
| User2 | GAL_2 | List 2 |
| User3 | GAL_2 | none |

You assign ABP1 to User1 and User2.

User3 is NOT assigned to an Address Book Policy.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statements

Yes

No

User1 can view the membership of List 2

User2 can only view the membership of GAL_2

User3 can view the membership of List 1

ANSWER:

Answer Area

Statements

Yes

No

User1 can view the membership of List 2

User2 can only view the membership of GAL_2

User3 can view the membership of List 1

QUESTION NO: 5 - (SIMULATION)

SIMULATION

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@LODSe382148.onmicrosoft.com Microsoft 365 Password: b#nqvZG*0w*4

The following information is for technical support purposes only:

Lab instance: 10658557

You need to ensure that all email sent from the Internet to the mailbox of a user named Admin1 is scanned for malware. The solution must use Dynamic Delivery.

To complete this task, sign in to the Microsoft 365 admin center.

ANSWER: See explanation below.

Explanation:

You need to add an ATP Safe Attachments policy and apply it to Admin1.

1. Go to Security and Compliance Admin Center.
2. Go to the Threat Management section > Policy > ATP Safe Attachments.
3. Click the 'plus' icon to create new policy.
4. Give the policy a name.
5. Select the 'Dynamic Delivery' option.
6. In the 'Applied To' section, in the 'if' section, select "The recipient is".
7. Click the 'Add condition' button and enter Admin1 and save the policy.

QUESTION NO: 6

Your company has a Microsoft Exchange Server 2019 organization.

You are auditing the Litigation Hold on the mailboxes of the company's research and development department.

You discover that the mailbox of a user named User1 has a Litigation Hold enabled.

You need to discover who placed the Litigation Hold on the mailbox of User1, and when the Litigation Hold was enabled.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. From the Exchange admin center, run an In-place eDiscovery and Hold report.
- B. From PowerShell, run the Get-Mailbox cmdlet.
- C. From the Exchange admin center, run a per-mailbox Litigation Hold report.
- D. From PowerShell, run the Get-MailboxStatistics cmdlet.

ANSWER: C D

QUESTION NO: 7

You have a Microsoft Exchange Server 2019 hybrid deployment. The on-premises Exchange organization contains 500 mailboxes. The Exchange Online tenant contains 200 mailboxes.

You need to ensure that all users can use the Microsoft Outlook mobile app to access their mailbox.

What should you do first?

- A. For each on-premises user, purchase a Microsoft Office 365 Enterprise E1 license.
- B. From Exchange Online, create a mobile device access policy.
- C. Add a TXT record to the public DNS zone of the Exchange organization.
- D. From the on-premises organization, create a mobile device access policy.

ANSWER: D

QUESTION NO: 8 - (HOTSPOT)

HOTSPOT

You manage a Microsoft Exchange Online subscription.

You use Advanced Threat Protection (ATP).

A partner company sends daily invoices to your company. The invoices are always named AdatumInvoice.xlsx.

Some users report that sometimes they cannot find the invoices in their Inbox folder.

You need to identify whether the invoices are identified as malicious by Microsoft 365.

Which two blades should you use? To answer, select the appropriate blades in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

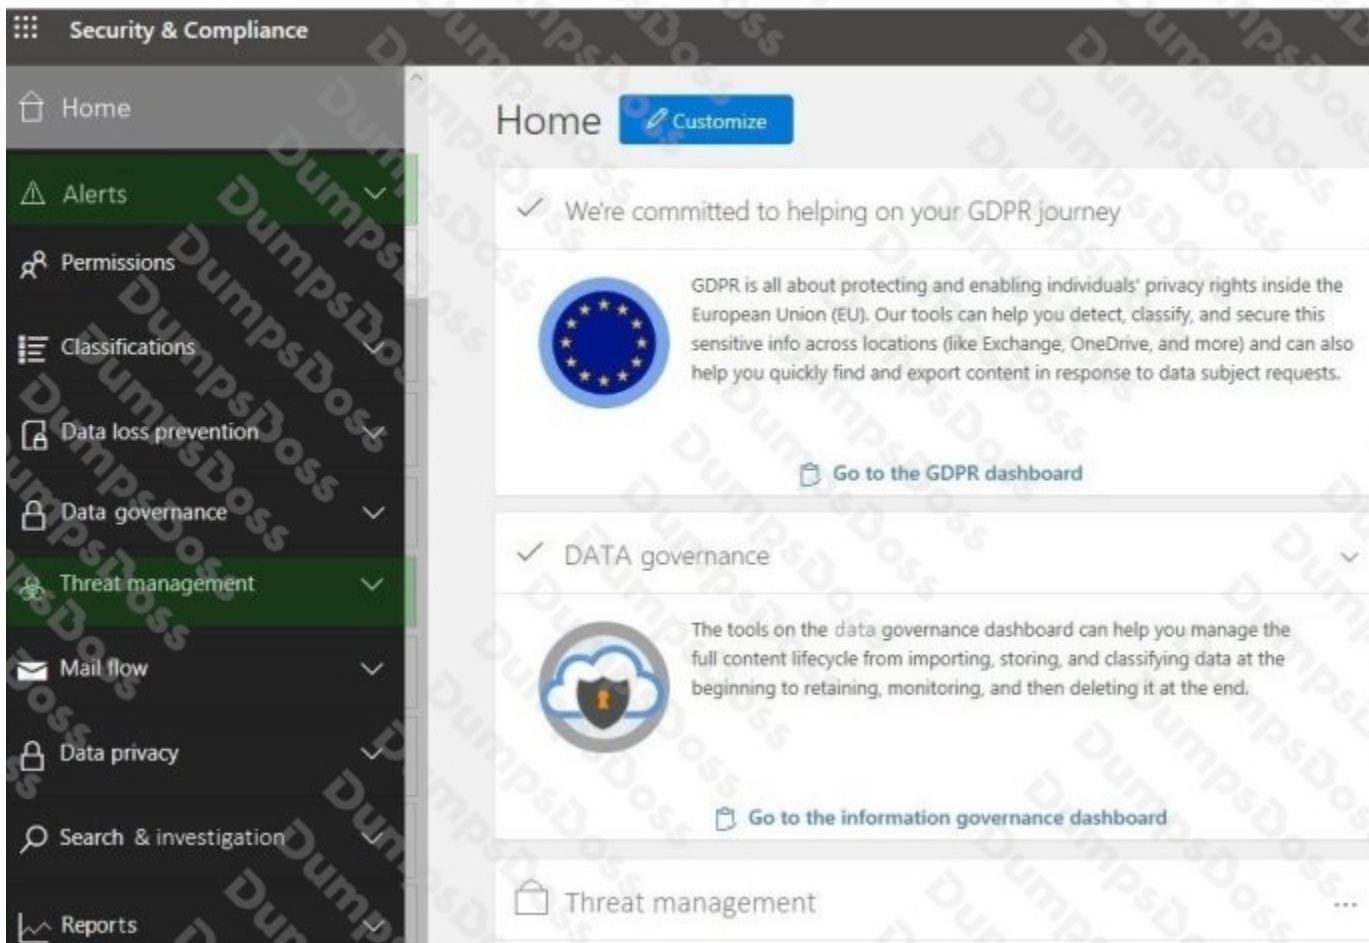

Answer Area

The screenshot shows the Microsoft Security & Compliance Center interface. On the left is a dark navigation pane with the following items: Home, Alerts, Permissions, Classifications, Data loss prevention, Data governance, Threat management, Mail flow, Data privacy, Search & investigation, and Reports. The main content area is titled 'Home' and features a 'Customize' button. It contains several informational cards:

- A top card with a checkmark icon and the text: "We're committed to helping on your GDPR journey".
- A card featuring the European Union flag icon, with text: "GDPR is all about protecting and enabling individuals' privacy rights inside the European Union (EU). Our tools can help you detect, classify, and secure this sensitive info across locations (like Exchange, OneDrive, and more) and can also help you quickly find and export content in response to data subject requests." Below this is a link: "Go to the GDPR dashboard".
- A card with a checkmark icon and the title "DATA governance". It features an icon of a cloud with a shield and a key, with text: "The tools on the data governance dashboard can help you manage the full content lifecycle from importing, storing, and classifying data at the beginning to retaining, monitoring, and then deleting it at the end." Below this is a link: "Go to the information governance dashboard".
- A card with a briefcase icon and the title "Threat management".

Explanation:

QUESTION NO: 9

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft Exchange Server 2019 organization that contains 200 mailboxes.

You need to add a second email address to each mailbox. The address must have a syntax that uses the first letter of each user's last name, followed by the user's first name, and then @fabrikam.com.

Solution: You create an email address policy that uses the %1g%s@fabrikam.com email address format.

Does this meet the goal?

A. Yes

B. No

ANSWER: B

Explanation:

QUESTION NO: 10 - (SIMULATION)

SIMULATION

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@LODSe382148.onmicrosoft.com Microsoft 365 Password: b#nqvZG*0w*4

The following information is for technical support purposes only:

Lab instance: 10658557

You need to ensure that the users in your tenant can only share calendar availability information with the other users in the tenant.

To complete this task, sign in to the Microsoft 365 admin center.

ANSWER: See explanation below.

Explanation:

You need to configure a Sharing Policy in the Exchange Admin Center.

1. Go to the Exchange Admin Center.
2. Go to the Organization section.
3. You will see two default sharing policies: Organization Sharing and Individual Sharing.

4. The organization sharing policy specifies the domains to share with. Select the organization sharing policy and click Edit to open the policy. Ensure that there are no external domains listed and close the policy.

5. The Individual Sharing policy allows sharing with external people. The easiest way to prevent this is to disable the policy. Untick the 'On' checkbox to disable the policy.
