## QUESTION NO: 1

You are tasked with integrating two new EMC Data Domain systems into an existing EMC NetWorker environment. Due to customer requirements, a VTL will be created on each Data Domain and drives will be presented to each NetWorker storage node.

Which best practice should be provided to the customer for this configuration?

**A.** Configure persistent binding on all hosts

/ddvar/support

**B.** Ensure less than five fabric hops

/ddvar/log/debug

**C.** Use switch encryption between the Data Domain and storage nodes

/data/col1/support

**D.** Multiplex data on the tape drives on all storage nodes

/data/col1/debug

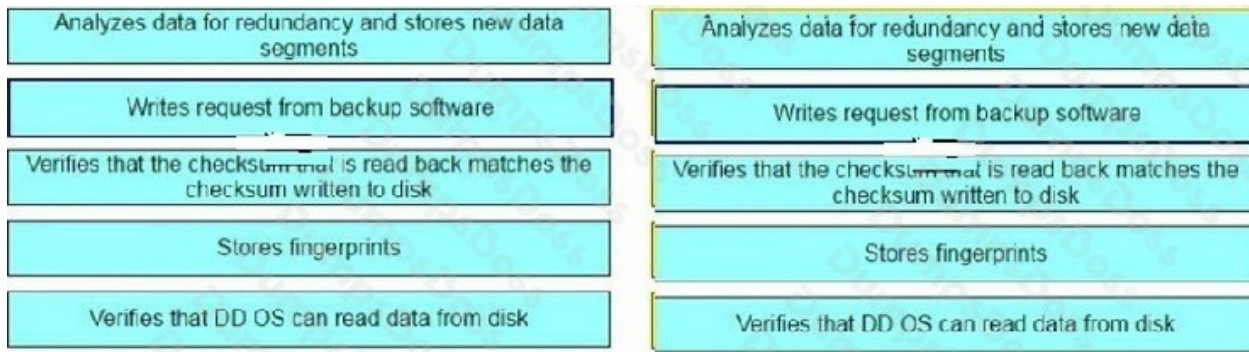

**ANSWER: A**

## QUESTION NO: 2 - (DRAG DROP)

What is the correct sequence of operations used by the Dell EMC Data Domain Data Invulnerability Architecture (DIA) in the end-to-end verification process?

**ANSWER:**

## QUESTION NO: 3

A customer has two EMC Data Domain systems. They plan to perform replication seeding before moving the replication target to a secured site by a third-party. The customer wants to protect the system from unauthorized data access.

What must be done to ensure the system is protected from unauthorized access or accidental exposure?

- A. Enable encryption and lock the file system
- B. Ensure system sanitization is performed before transport
- C. Enable local compression and archive the data
- D. Ensure system administrator credentials are updated with a strong password

**ANSWER: A**

## QUESTION NO: 4

Which protocols are supported with EMC Data Domain Extended Retention?

- A. CIFS, NFS, VTL, DD Boost
- B. NFS, DD Boost, NDMP
- C. VTL, NDMP, CIFS, NFS
- D. DD Boost, NFS, CIFS, iSCSI

**ANSWER: A**

## QUESTION NO: 5

What is the minimum required storage configuration that DD VE supports for Dell EMC Data Domain Cloud Tier?

- A. 8TB
- B. 16 TB
- C. 32 TB
- D. 64 TB

**ANSWER: D**

## QUESTION NO: 6

A customer is backing up data to an EMC Data Domain system with Extended Retention. To which tier(s) is the data written?

- A. Active
- B. Recent
- C. Oldest
- D. Active and Recent

**ANSWER: A**

## QUESTION NO: 7

How can Retention Lock Compliance be removed from an EMC Data Domain system?

- A. Reinstall the operating system from a USB key
- B. Run the file system destroy command
- C. Disable Retention Lock Compliance using security officer credentials
- D. Expire all locked data and then disable Retention Lock

**ANSWER: A**

## QUESTION NO: 8

Refer to the exhibit.

You are installing an EMC Data Domain system with expansion shelves. When is the cable connector shown in the exhibit used?

- A. Connecting to the Expansion Port on an ES30 Shelf
- B. Connecting to the Host Port on an ES30 Shelf
- C. Connecting to the Expansion Port on an ES20 Shelf
- D. Connecting to the Host Port on an ES20 Shelf

**ANSWER: A**

## QUESTION NO: 9

What is required to implement Dell EMC ProtectPointwith DD Boost?

- A. Both Fibre Channel and SAS connectivity
- B. SAS connectivity only
- C. Fibre Channel connectivity only
- D. Both IP and Fibre Channel connectivity

**ANSWER: A**

## QUESTION NO: 10

If cleaning is already in progress, when does data movement to the retention tier on a Dell EMC Data Domain system start?

- A. Already started; it occurs during cleaning
- B. Immediately after the cleaning completes
- C. After suspending the cleaning process
- D. During the next scheduled data movement

**ANSWER: D**
