## QUESTION NO: 1

Which tools are listed under “System Analysis and Tools” selection of Unisphere for RecoverPoint?

- A. Users and Security, Configure System Reports and Alerts, Collect System Information
- B. Detect Bottlenecks, Balance Load, Configure System Reports and Alerts
- C. Users and Security, Configure System Reports and Alerts, Change Security Level
- D. Detect Bottlenecks, Balance Load, Collect System Information

**ANSWER: D**

## QUESTION NO: 2

A RecoverPoint system has been deployed with XtremIO at production and disaster recovery sites. What is an accurate statement, if the replication mode for a Consistency Group has been set as “Continuous”?

- A. Effective RPO will be 0 seconds
- B. Set customized time between cycles
- C. Effective RPO can be <60 seconds
- D. Set minimum time between cycles

**ANSWER: D**

## QUESTION NO: 3

A storage administrator is unable to perform Direct Access to a copy in their RecoverPoint environment. Which array type has this limitation with regards to RecoverPoint copies?

- A. XtremIO
- B. VMAX
- C. VNX
- D. VPLEX

**ANSWER: A**

## QUESTION NO: 4

In Unisphere for RecoverPoint, which wizard will allow an administrator to manage and monitor all correctly accessed copies undergoing testing, failover, and production recovery?

- A. Protect Volumes
- B. Test a Copy
- C. Manage Protection
- D. Manage Recovery

**ANSWER: B**

## QUESTION NO: 5

Which command can be used to reduce the impact of the initial volume synchronization on production applications?

- A. `config_io_throttling throttling=high`
- B. `config_link_policy group= cgroup copy_1=prod_copy copy_2= dr_copy regulate_application=yes`
- C. `config_link_policy group= cgroup copy_1=prod_copy copy_2= dr_copy regulate_application=no`
- D. `config_io_throttling throttling=none`

**ANSWER: B**

## QUESTION NO: 6

In order to automatically provision Journal volumes, what does RecoverPoint require when this feature is used?

- A. Dedicated Resource Pools
- B. Dedicated RecoverPoint Appliance
- C. Consistency Group for each Journal volume
- D. Total volume count must be less than 8,000

**ANSWER: A**

## QUESTION NO: 7

When attempting to protect new XtremIO LUNs, the administrator is unable to add an XtremIO source LUN to the Consistency Group.

What is a possible reason for this issue?

- A. XtremIO array was not licensed in RecoverPoint

- B. RecoverPoint/EX only allows the protection of VNX arrays
- C. XtremIO LUN was created with a 512-byte block size
- D. XtremIO arrays are only protected with RecoverPoint for VMs.

**ANSWER: A**

## QUESTION NO: 8

Which RPA interface is used for management?

- A. eth1
- B. eth0
- C. iSCSI-1
- D. iSCSI-2

**ANSWER: A**

## QUESTION NO: 9

Which RecoverPoint CLI command can be used to show a summarization of the errors and warnings for either one site or the entire RecoverPoint system?

- A. get\_rpa\_states
- B. get\_events\_log
- C. get\_system\_status
- D. get\_clusters\_topology

**ANSWER: B**

## QUESTION NO: 10

What describes RecoverPoint asynchronous replication write operations to the Journal volumes?

- A. Journal is written to at three times the rate of the production volumes
- B. Volumes of the same capacities will be concatenated and not striped
- C. Writes to the Journal volume are typically small sequential writes
- D. Writes to the Journal volume are typically large sequential writes

**ANSWER: D**
