## QUESTION NO: 1

Why is software-only security on a printer insufficient?

- A. Software protection does not act as a deterrent to a hacker as much as the hardware protection does.
- B. Software will not stop the printer from being physically moved, but the embedded HP Sure Sense hardware will.
- C. It is more difficult to hack hardware, such as a printer, because you must be in front of it, while software can be hacked remotely.
- D. The software is not compatible with all systems and networks in the same way and opens ports that might be used for attacks.

ANSWER: D

## QUESTION NO: 2

Why is it important to regularly ensure printer compliance?

- A. to ensure paper is not being wasted on personal print jobs
- B. to ensure they are online every day
- C. to ensure they are working with expected reliability and print quality
- D. to ensure they are not vulnerable to attack and to avoid potential fines

ANSWER: C

## QUESTION NO: 3

Which possible regulatory violations could apply when printouts containing sensitive information are left in the output bin?

- A. EPTA (Europe Printing Trade Authority)
- B. GDPR (General Data Protection Regulation) and PCI-DSS (Payment Card Industry Data Security Standard)
- C. ISO (Industry Standard Operations) N102S
- D. GDP CIDSS (General Data Payment Card Industry Data Security Standard)

**ANSWER: C**

## QUESTION NO: 4

What is HP Jet Advantage Quick Assess?

- A. a tool that accesses customer data permanently shared with HP
- B. an IT management tool for quick access to the printer usage information
- C. a tool that simulates a network attack on printers, proving the network and printer vulnerability
- D. a tool to expose poorly-configured printers within customer environment

**ANSWER: D**

## QUESTION NO: 5

What happens every time you turn on an HP printer running the FutureSmart firmware?

- A. HP Sure Start checks the network connection to see if connected to the correct network.
- B. HP Sure Protect confirms whether the BIOS is the same as its cloud copy.
- C. HP Sure Start validates that the BIOS code has not been altered from the original trusted version.
- D. A message is sent to the IT team to inform them the printer is powered on and working.

**ANSWER: B**
