Workspace ONE Intelligence is a cloud-only service, hosted on Amazon Web Services (AWS), that offers the following advantages:

- Reduces the overhead of infrastructure and network management, which allows users to focus on utilizing the product.
- Complements the continuous integration and continuous delivery approach to software development, allowing new features and functionality to be released with greater speed and frequency.
- Helps with solution delivery by maintaining only one version of the software without any patching.
- AWS are industry leaders in cloud infrastructure, with a global footprint that enables the service to be hosted in different regions around the world.
