Explanation:

Reference: <https://www.vmware.com/content/dam/digitalmarketing/vmware/en/pdf/products/nsx/vmware-nsx-datasheet.pdf>

QUESTION NO: 4 - (DRAG DROP)

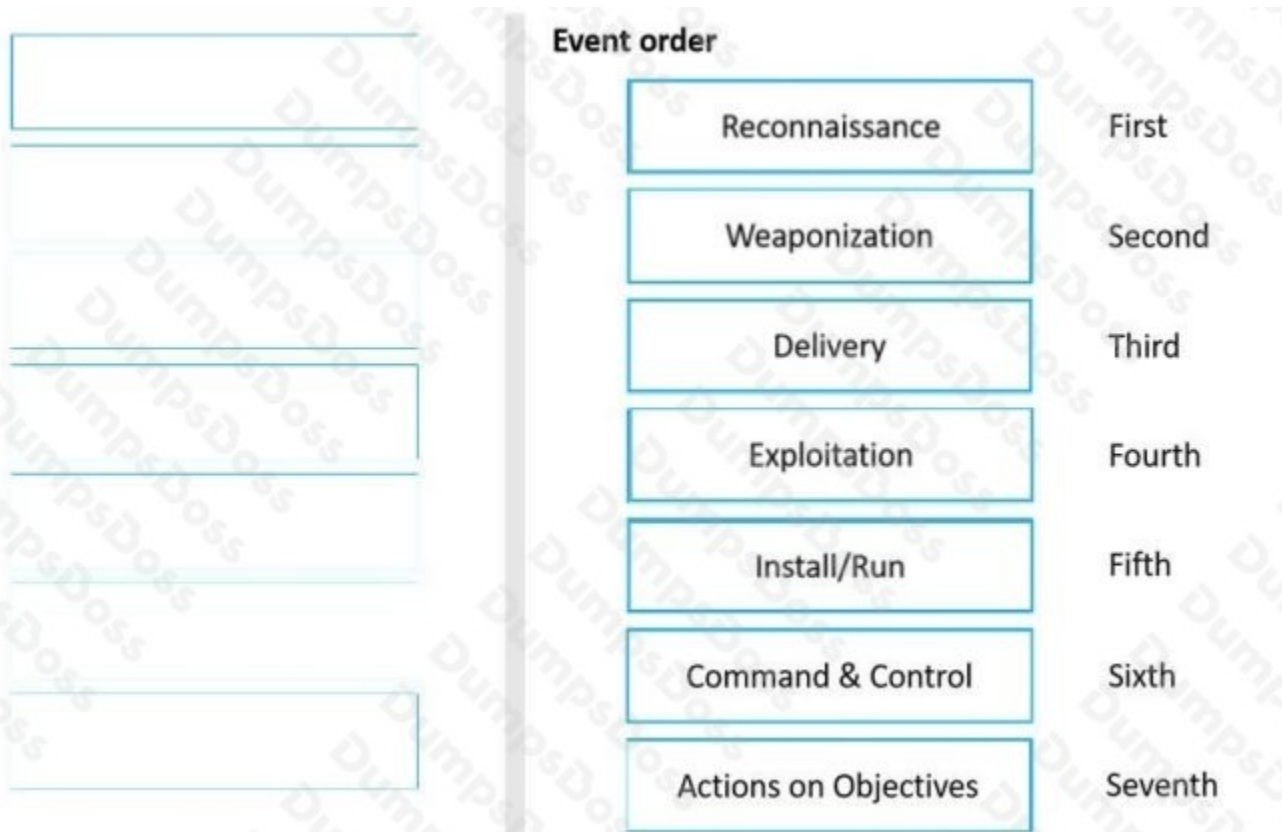

DRAG DROP

Drag and drop the Cyber Kill events on the left into their proper sequential order on the right.

Select and Place:

ANSWER:

Explanation:

QUESTION NO: 5

Which two are true about a VMware Service-defined Firewall? (Choose two.)

- A. A firewall that allows you to use 3rd party features like IDS/IPS, threat protection, anti-bot, and anti-virus solutions
- B. A firewall that blocks external access into your internal network based on IP services
- C. A firewall that enforces policy for North-South traffic
- D. A firewall that is auto scalable as new workloads are deployed
- E. A firewall that provides East-West protection between internal applications

ANSWER: A E

Explanation:

Reference: <https://www.vmware.com/content/dam/digitalmarketing/vmware/en/pdf/products/vmware-nsx-service-defined-firewall.pdf>

QUESTION NO: 6

When filtering firewall rules after selecting an object to filter by, which four columns does the filter search? (Choose four.)

- A. Services
- B. Action
- C. Protocol
- D. Log
- E. Applied To
- F. Source
- G. Destinations

ANSWER: A E F G

Explanation:

The screenshot shows a documentation page titled "Filter Firewall Rules in Manager Mode" from VMware NSX T Data Center 3.1. The page includes a table of contents on the left with items like "Add a Firewall Rule in Manager Mode", "Delete a Firewall Rule in Manager Mode", "Edit the Default Distributed Firewall Rule in Manager Mode", and "Change the Order". The main content area features a "Selected product version" dropdown set to "VMware NSX T Data Center 3.1", a date "Updated on 04/06/2020", and a paragraph explaining that users can apply filters to display a subset of rules. A "Prerequisites" section notes that "Manager" mode must be selected in the NSX Manager user interface.

Reference: <https://docs.vmware.com/en/VMware-NSX-T-Data-Center/3.1/administration/GUID-BF564729-868B-4136-9AD0-857C47078FB3.html>

QUESTION NO: 7

In a Workspace ONE deployment, Per App Tunnel uses the Native Platform API for which platforms?

- A. iOS & Android only
- B. iOS, Android, MacOS & Windows
- C. iOS & MacOS only
- D. Android & Windows only

ANSWER: A**Explanation:**

The screenshot shows a VMware Digital Workspace Tech Zone article. The page header includes the VMware logo, 'Digital Workspace Tech Zone', and navigation links for 'Communities', 'Customer Connect', and 'VMware.com'. A search bar is visible on the right. The article title is 'Deploying VMware Workspace ONE Tunnel in MAM Mode'. The content discusses web applications through Per-App Tunnel and mentions that the Workspace ONE Tunnel app is not required for this scenario. It also notes that Workspace ONE SDK is available on iOS and Android platforms. The article is rated 5 stars by the community and the user. The table of contents includes: Overview, Getting Started with Workspace ONE Tunnel, Introduction, Prerequisites, Tunnel Mode (Per-App vs Full Device Tunnel), and Connected Endpoints.
