QUESTION NO: 8 - (DRAG DROP)

You have the following two datasets:

- A Microsoft Excel worksheet that has two columns named Employee Name and Department
- A Microsoft SQL Server table that has three columns named Employee Name, Pay Grade and Team Size.

You want to use Tableau Prep to join the two datasets.

Which three actions should you perform in order? (Place the three correct options in order.)

The screenshot shows a drag-and-drop question interface. On the left, under the heading "Options", there are six text boxes containing the following actions: "Specify Department and Team Size as a join condition.", "Join both datasets and select the join type.", "From the connections pane, connect to both datasets.", "Specify Employee Name as the join key.", "Open both data sources in Tableau Desktop.", and "Add a step to aggregate the data in the SQL Server table." On the right, under the heading "Answer Area", there are three empty text boxes. A yellow circular icon with a lightning bolt and a question mark is positioned between the options and the answer area. Navigation arrows (left, right, up, down) are visible on the interface.

ANSWER:

This screenshot is identical to the previous one, but with the answer selected. The text box "Specify Employee Name as the join key." in the "Options" list is highlighted with a yellow circle. In the "Answer Area", the text box "Specify Employee Name as the join key." is now populated with the selected option. The yellow lightning bolt icon remains in the same position.
