QUESTION NO: 1 - (HOTSPOT)

Welcome to your first day as a Fictional Company, LLC helpdesk employee. Please work the tickets in your helpdesk ticket queue.

Click on individual tickers to see the ticket details. View attachments to determine the problem.

Select the appropriate issue from the 'issue' drop-down menu. Then, select the MOST efficient resolution from the 'Resolution' drop-down menu. Finally, select the proper command or verification to remediate or confirm your fix of the issue from the Verify Resolve drop-down menu.

TEST QUESTION

Welcome to your first day as a Fictional Company, LLC helpdesk employee. Please work the tickets in your helpdesk ticket queue.

INSTRUCTIONS

Click on individual tickets to see the ticket details. View attachments to determine the problem.

Select the appropriate issue from the 'issue' drop-down menu. Then, select the MOST efficient resolution from the 'Resolution' drop-down menu. Finally, select the proper command or verification to remediate or confirm your fix of the issue from the 'Verify/Resolve' drop-down menu.

If at any time you would like to bring back the initial state of the simulation, please click the Reset All button.

Issue:

Resolution:

- Corrupt OS
- Recent Windows Updates
- Graphics Drive Updates
- BSOD
- Printing Issues
- Limited Network Connectivity
- Services Failed to Start
- User Profile is Corrupted
- Application Crash
- User cannot access shared resource
- URL contains typo
- Reinstall Operating System
- Rollback Updates
- Rollback Drivers
- Repair Application
- Restart Print Spooler
- Disable Network Adapter
- Update Network Drivers
- Refresh DHCP
- Rebuild Windows Profile
- Apply Updates
- Repair installation
- Restore from Recovery Partition
- Remap network drive
- Verify integrity of disk drive
- Initiate screen share session with user
- Windows recovery environment
- Inform user of AUP violation

Verify/Resolve:

- chkdsk
- dism
- diskpart
- sfc
- dd
- ctrl + alt + del
- net use
- net user
- netstat
- netsh
- bootrec

QUESTION NO: 2

An IT services company that supports a large government contract replaced the Ethernet cards on several hundred desktop machines to comply With regulatory requirements. Which of the following disposal methods for the non-compliant cards is the MOST environmentally friendly?

- A. incineration
- B. Resale

- C. Physical destruction
- D. Dumpster for recycling plastics

ANSWER: D

Explanation:

When disposing of non-compliant Ethernet cards, the most environmentally friendly option is to use a dumpster for recycling plastics. This method is the most effective way to reduce the amount of waste that is sent to landfills, and it also helps to reduce the amount of energy used in the production of new materials. Additionally, recycling plastics helps to reduce the amount of toxic chemicals that can be released into the environment.

According to CompTIA A+ Core 2 documents, "The most environmentally friendly disposal method for non-compliant Ethernet cards is to use a dumpster for recycling plastics. This method is the most effective way to reduce the amount of waste that is sent to landfills, and it also helps to reduce the amount of energy used in the production of new materials."

QUESTION NO: 3

A user calls the help desk and reports a workstation is infected with malicious software. Which of the following tools should the help desk technician use to remove the malicious software? (Select TWO).

- A. File Explorer
- B. User Account Control
- C. Windows Backup and Restore
- D. Windows Firewall
- E. Windows Defender
- F. Network Packet Analyzer

ANSWER: A E

Explanation:

The correct answers are E. Windows Defender and A. File Explorer. Windows Defender is a built-in antivirus program that can detect and remove malicious software from a workstation. [File Explorer can be used to locate and delete files associated with the malicious software1](#)

QUESTION NO: 4

A user is unable to log in to the domain with a desktop PC, but a laptop PC is working properly on the same network. A technician logs in to the desktop PC with a local account but is unable to browse to the secure intranet site to get troubleshooting tools. Which of the following is the MOST likely cause of the issue?

- A. Time drift

- B. Dual in-line memory module failure
- C. Application crash
- D. Filesystem errors

ANSWER: A

Explanation:

The most likely cause of the issue is a “time drift”. Time drift occurs when the clock on a computer is not synchronized with the clock on the domain controller. This can cause authentication problems when a user tries to log in to the domain. [The fact that the technician is unable to browse to the secure intranet site to get troubleshooting tools suggests that there may be a problem with the network connection or the firewall settings on the desktop PC12](#)

QUESTION NO: 5

A user updates a mobile device's OS. A frequently used application becomes consistently unresponsive immediately after the device is launched. Which of the following troubleshooting steps should the user perform FIRST?

- A. Delete the application's cache.
- B. Check for application updates.
- C. Roll back the OS update.
- D. Uninstall and reinstall the application.

ANSWER: B

Explanation:

Sometimes, an OS update can cause compatibility issues with some applications that are not optimized for the new version of the OS. To fix this, the user should check if there are any updates available for the application that can resolve the issue. The user can check for application updates by following these steps:

QUESTION NO: 6

Which of the following must be maintained throughout the forensic evidence life cycle when dealing with a piece of evidence?

- A. Acceptable use
- B. Chain of custody
- C. Security policy
- D. Information management

ANSWER: B

Explanation:

The aspect of forensic evidence life cycle that must be maintained when dealing with a piece of evidence is chain of custody. This is because chain of custody is the documentation of the movement of evidence from the time it is collected to the time it is presented in court, and it is important to maintain the integrity of the evidence

QUESTION NO: 7

A user reports that the hard drive activity light on a Windows 10 desktop computer has been steadily lit for more than an hour, and performance is severely degraded. Which of the following tabs in Task Manager would contain the information a technician would use to identify the cause of this issue?

- A. Services
- B. Processes
- C. Performance
- D. Startup

ANSWER: B

Explanation:

Processes tab in Task Manager would contain the information a technician would use to identify the cause of this issue. The Processes tab in Task Manager displays all the processes running on the computer, including the CPU and memory usage of each process. [The technician can use this tab to identify the process that is causing the hard drive activity light to remain lit and the performance degradation1](#)

QUESTION NO: 8 - (SIMULATION)

A user reports that after a recent software deployment to upgrade applications, the user can no longer use the Testing program.

However, other employees can successfully use the Testing program.

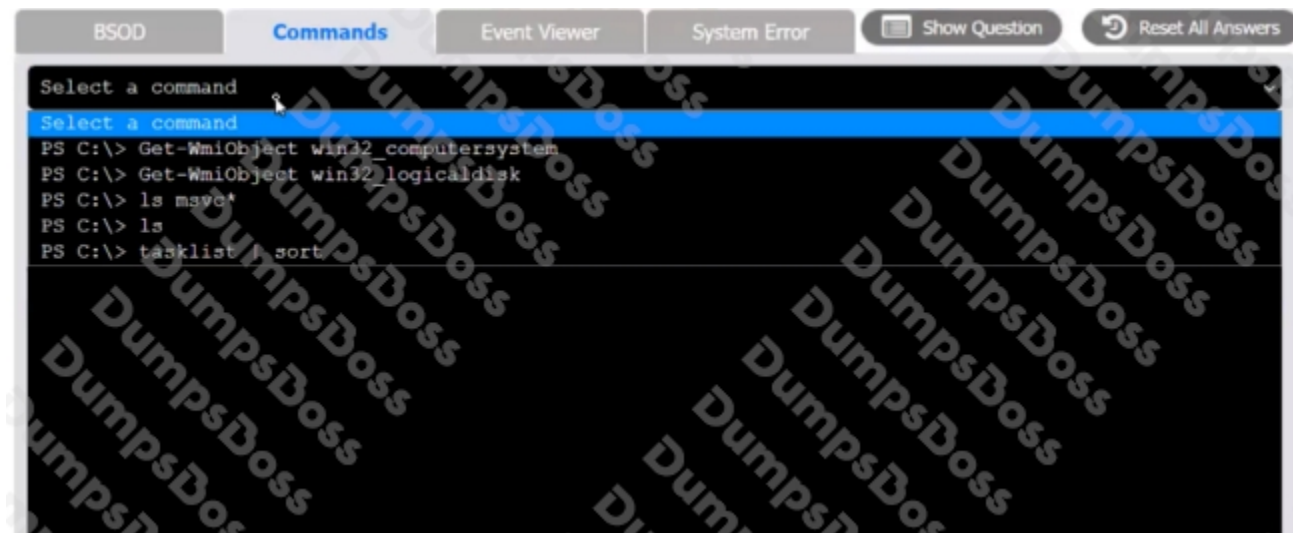

INSTRUCTIONS

Review the information in each tab to verify the results of the deployment and resolve any issues discovered by selecting the:

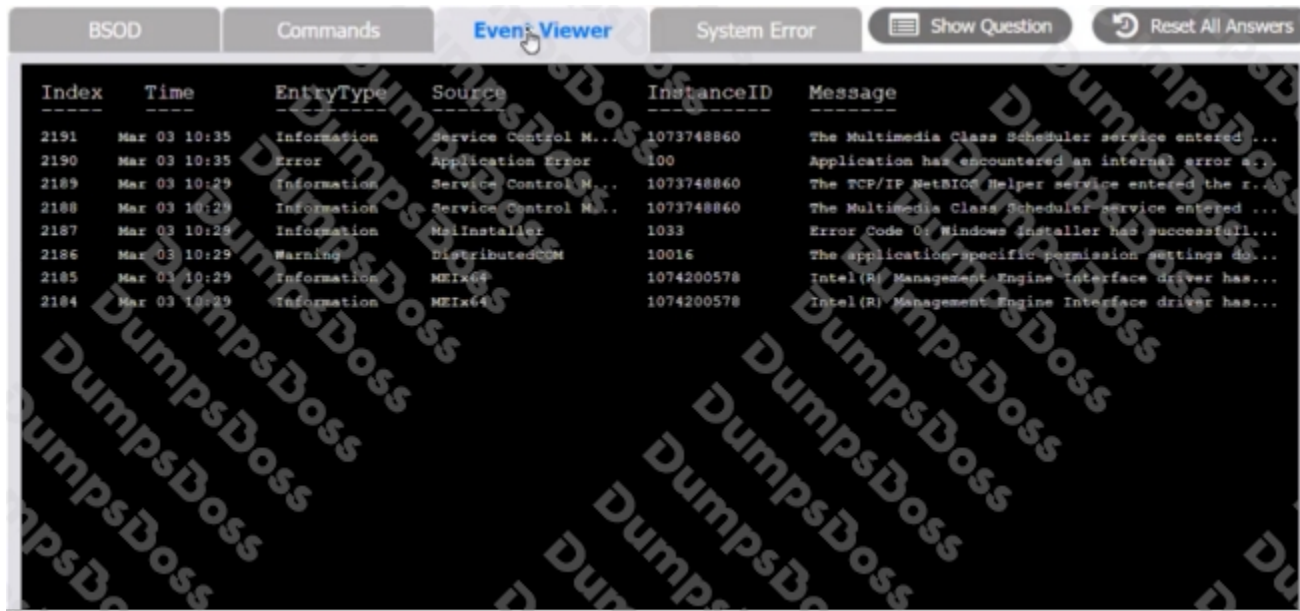

BSOD

Commands:

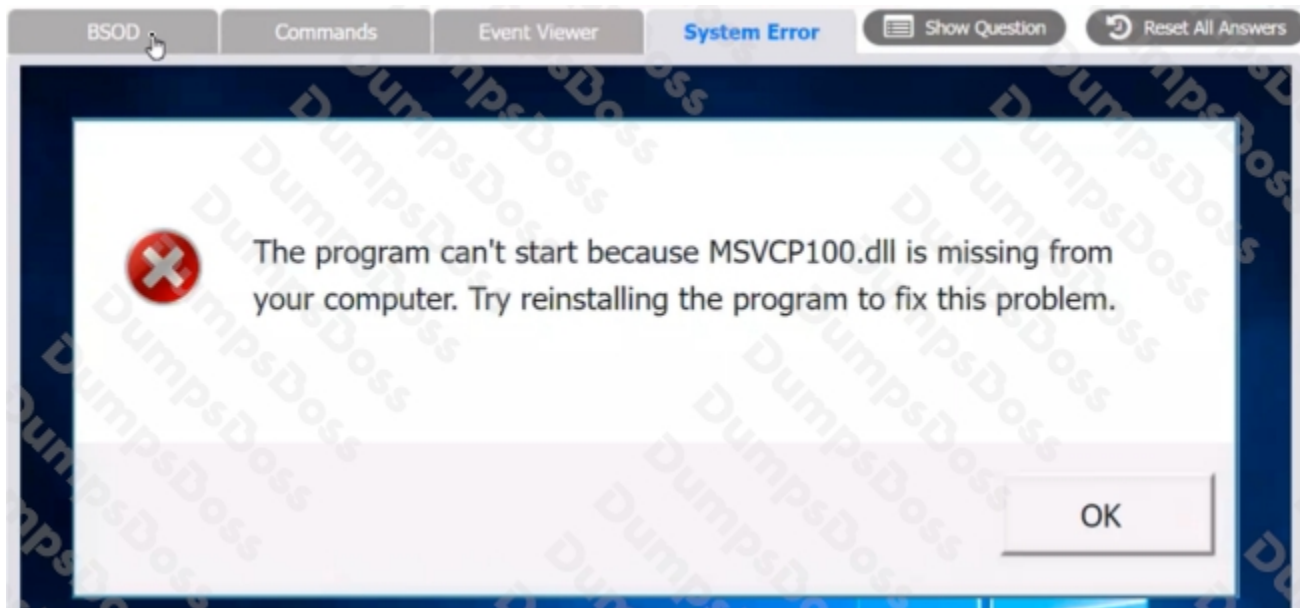

Event Viewer:

ANSWER: Pending

QUESTION NO: 9

A team of support agents will be using their workstations to store credit card data. Which of the following should the IT department enable on the workstations in order to remain compliant with common regulatory controls? (Select TWO).

- A. Encryption
- B. Antivirus

- C. AutoRun
- D. Guest accounts
- E. Default passwords
- F. Backups

ANSWER: A F

Explanation:

Encryption is a way of protecting cardholder data by transforming it into an unreadable format that can only be decrypted with a secret key¹. Backups are a way of ensuring that cardholder data is not lost or corrupted in case of a disaster or system failure². Both encryption and backups are part of the PCI DSS requirements that apply to any entity that stores, processes, or transmits cardholder data¹. The other options are not directly related to credit card data security or compliance.

QUESTION NO: 10

A user's corporate phone was stolen, and the device contains company trade secrets. Which of the following technologies should be implemented to mitigate this risk? (Select TWO).

- A. Remote wipe
- B. Firewall
- C. Device encryption
- D. Remote backup
- E. Antivirus
- F. Global Positioning System

ANSWER: A C

Explanation:

[Remote wipe is a feature that allows data to be deleted from a device or system remotely by an administrator or owner¹. It is used to protect data from being compromised if the device is lost, stolen, or changed hands¹. Device encryption is a feature that helps protect the data on a device by making it unreadable to unauthorized users². It requires a key or a password to access the data². Both features can help mitigate the risk of losing company trade secrets if a corporate phone is stolen.](#)

QUESTION NO: 11

Which of the following would MOST likely be deployed to enhance physical security for a building? (Select TWO).

- A. Multifactor authentication
- B. Badge reader
- C. Personal identification number
- D. Firewall
- E. Motion sensor
- F. Soft token

ANSWER: B E

Explanation:

Badge reader and motion sensor are devices that can be deployed to enhance physical security for a building. A badge reader is a device that scans and verifies an identification card or tag that grants access to authorized personnel only. A badge reader can help prevent unauthorized entry or intrusion into a building or a restricted area. A motion sensor is a device that detects movement and triggers an alarm or an action when motion is detected. A motion sensor can help deter or alert potential intruders or trespassers in a building or an area. Multifactor authentication is a method of verifying identity using two or more factors, such as something you know, something you have or something you are. Multifactor authentication is not a device that can be deployed to enhance physical security for a building but a technique that can be used to enhance logical security for systems or services. Personal identification number is a numeric code that can be used as part of authentication or access control. Personal identification number is not a device that can be deployed to enhance physical security for a building but an example of something you know factor in multifactor authentication. Firewall is a device or software that filters network traffic based on rules and policies. Firewall is not a device that can be deployed to enhance physical security for a building but a device that can be used to enhance network security for systems or services. Soft token is an application or software that generates one-time passwords or codes for authentication purposes. Soft token is not a device that can be deployed to enhance physical security for a building but an example of something you have factor in multifactor authentication. QUESTION NO: 12

A technician needs to exclude an application folder from being cataloged by a Windows 10 search. Which of the following utilities should be used?

- A. Privacy
- B. Indexing Options
- C. System
- D. Device Manager

ANSWER: B

Explanation:

To exclude an application folder from being cataloged by a Windows 10 search, the technician should use the Indexing Options [utility](#)

QUESTION NO: 13

A desktop engineer is deploying a master image. Which of the following should the desktop engineer consider when building the master image? (Select TWO).

- A. Device drivers
- B. Keyboard backlight settings
- C. Installed application license keys
- D. Display orientation
- E. Target device power supply
- F. Disabling express charging

ANSWER: A C

QUESTION NO: 14

A technician received a call stating that all files in a user's documents folder appear to be Changed, and each of the files now has a look file

extension Which of the following actions is the FIRST step the technician should take?

- A. Run a live disk clone.
- B. Run a full antivirus scan.
- C. Use a batch file to rename the files-
- D. Disconnect the machine from the network

ANSWER: D

Explanation:

The CompTIA A+ Core 2 220-1002 exam covers this topic in the following domains: 1.2 Given a scenario, use appropriate resources to support users and 1.3 Explain the importance of security awareness.

QUESTION NO: 15

A technician installed a known-good, compatible motherboard on a new laptop. However, the motherboard is not working on the laptop. Which of the following should the technician MOST likely have done to prevent damage?

- A. Removed all jewelry
- B. Completed an inventory of tools before use
- C. Practiced electrical fire safety

D. Connected a proper ESD strap

ANSWER: A

Explanation:

The technician should have connected a proper ESD strap to prevent damage to the motherboard. ESD (electrostatic discharge) can cause damage to electronic components, and an ESD strap helps to prevent this by grounding the technician and preventing the buildup of static electricity. Removing all jewelry is also a good practice, but it is not the most likely solution to this problem.
