QUESTION NO: 1

How does a secure web gateway (SWG) protect users from web-based threats while still enforcing corporate acceptable use policies?

- A. Users are mapped via server logs for login events and syslog messages from authenticating services.
- B. It uses a cloud-based machine learning (ML)-powered web security engine to perform ML-based inspection of web traffic in real-time.
- C. It prompts the browser to present a valid client certificate to authenticate the user.
- D. Users access the SWG, which then connects the user to the website while still performing security measures.

ANSWER: D

QUESTION NO: 2

Which two services are provided by Prisma Access Insights? (Choose two.)

- A. summary overview screen of the health and performance of an organization's entire Prisma Access environment
- B. configuration of the on-premises firewall located behind the service-connection termination
- C. detection of hard-to-find security issues via AI-based innovations to normalize, analyze, and stitch together an enterprise's data
- D. multiple dashboards for focused views of different deployments, the corresponding alerts, and the health status of the infrastructure

ANSWER: A D

QUESTION NO: 3

Which three decryption methods are available in a security processing node (SPN)? (Choose three.)

- A. SSL Outbound Proxy
- B. SSHv2 Proxy
- C. SSL Forward Proxy
- D. SSL Inbound Inspection
- E. SSH Inbound Inspection

ANSWER: B C D

QUESTION NO: 4

Which App Response Time metric measures the amount of time it takes to transfer incoming data from an external server to a local client?

- A. UDP Response Time (UDP-TRT)
- B. Server Response Time (SRT)
- C. Network Transfer Time (NTTn)
- D. Round Trip Time (RTT)

ANSWER: D

QUESTION NO: 5

What is feature of Autonomous Digital Experience Management (ADEM)?

- A. It applies configuration changes and provides credential management, role-based controls, and a playbook repository.
- B. It provides customized forms to collect and validate necessary parameters from the requester.
- C. It natively ingests, normalizes, and integrates granular data across the security infrastructure at nearly half the cost of legacy security products attempting to solve the problem.
- D. It provides IT teams with single-pane visibility that leverages endpoint, simulated, and real-time user traffic data to provide the most complete picture of user traffic flows possible.

ANSWER: D

QUESTION NO: 6

Which two services are part of the Palo Alto Networks cloud-delivered security services (CDSS) package? (Choose two.)

- A. virtual desktop infrastructure (VDI)
- B. Internet of Things (IoT) Security
- C. Advanced URL Filtering (AURLF)
- D. security information and event management (SIEM)

ANSWER: B C

QUESTION NO: 7

Organizations that require remote browser isolation (RBI) to protect their users can automate connectivity to third-party RBI products with which platform?

- A. Zero Trust
- B. SaaS Security API
- C. GlobalProtect
- D. CloudBlades API

ANSWER: A

QUESTION NO: 8

How does Autonomous Digital Experience Management (ADEM) improve user experience?

- A. The root cause of any alert can be viewed with a single click, allowing users to swiftly stop attacks across the environment.
- B. The virtual appliance receives and stores firewall logs without using a local Log Collector, simplifying required steps users must take.
- C. Working from home or branch offices, all users get the benefit of a digital experience management solution without the complexity of installing additional software and hardware.
- D. It applies in-depth hunting and forensics knowledge to identify and contain threats before they become a breach.

ANSWER: C

QUESTION NO: 9

The Cortex Data Lake sizing calculator for Prisma Access requires which three values as inputs? (Choose three.)

- A. throughput of remote networks purchased
- B. cloud-managed or Panorama-managed deployment
- C. retention period for the logs to be stored
- D. number of log-forwarding destinations
- E. number of mobile users purchased

ANSWER: A C E

QUESTION NO: 10

What are three ways the secure access service edge (SASE) model can help an organization? (Choose three.)

- A. cost savings
- B. data protection
- C. increased licensing requirements
- D. increased performance
- E. decreased reliance on best practices

ANSWER: A B D
