QUESTION NO: 1

Your company has a warehouse that is classified as two different zones to enforce allocation and picking from only one subinventory at a time. The business has a contract with a specific outbound logistics carrier to deliver all orders for a particular customer zone or postal code.

How do you release orders that are scheduled to be fulfilled from a particular subinventory and delivered through a specific carrier?

Order	Item	Item Description	Ordered Quantity	UOM	Warehouse Zone / Sub Inventory	Ship Method
10001	CM6755020	8" Black Case with Bluetooth Keyboard	1	Ea	Zone1	ABC
10001	AT1501010	Vision Networking 150x 10GB Switch	1	Ea	Zone2	ABC
20001	CM6755020	8" Black Case with Bluetooth Keyboard	1	Ea	Zone1	XYZ
20001	AT1501010	Vision Networking 150x 10GB Switch	1	Ea	Zone2	XYZ

- A. Define pick wave release rules specifying the shipment method and the subinventory on the Demand Selection Criteria tab.
- B. Define a release sequence rule using the attribute as subinventory.
- C. Use a picking rule specifying the pickling order for the subinventory.
- D. Define pick wave release rules specifying the shipment method and pick from a subinventory under the Options tab.
- E. Define a release sequence rule using the attribute as shipment priority.

ANSWER: D

QUESTION NO: 2

Your customer requires order revisions from an external system. The customer is concerned that all order lines will have to be sent again in the revised order even though the customer typically changes only one or two lines. Which three statements are true? (Choose three.)

- A. Order lines can be canceled by sending a cancellation request.
- B. A revised order can contain just the updated order line.
- C. All order lines will have to be sent again in the revised order.
- D. Missing order lines are assumed to be canceled.
- E. Missing order lines are not assumed to be canceled.

ANSWER: A B D

QUESTION NO: 3

Which action must be performed on the orchestration process user interface to activate an orchestration process after the order orchestration configurations are completed?

- A. Download the generated orchestration process.
- B. Validate the orchestration process.
- C. Release the orchestration process.
- D. Release and deploy the orchestration process.

ANSWER: D

Explanation:

QUESTION NO: 6

Identify two valid use cases where a process assignment rule is defined to assign an orchestration process. (Choose two.)

- A. when you require multiple orchestration processes for one fulfillment line
- B. when you require one orchestration process for one fulfillment line
- C. when you require one orchestration process for sales order lines
- D. when you require one orchestration process for multiple fulfillment lines

ANSWER: A D

QUESTION NO: 7

Your customer has requested that sales order details are sent to his e-mail address. How will Order Management Cloud format the order details in the e-mail?

- A. Order Management will include the order details in an attached Word document.
- B. Order Management will include the order details in an attached PDF (Portable Document Format).
- C. You cannot send order details through an e-mail.
- D. Order Management will include a link to a webpage with order details in the body of the e-mail.
- E. Order Management will include the order details in the body of the e-mail.

ANSWER: B

QUESTION NO: 9

Which two statements are true about the functional capabilities of Oracle Cloud Configurator? (Choose two.)

- A. For users who do not have access to Oracle Fusion Product Hub, Oracle provides an alternative option to create models directly in the workspace area.
- B. Only the optional structure and attributes of a Product Item are imported from Product Hub to Configurator and not the mandatory elements because they cannot be configured by an end user.
- C. Multiple drafts of the same model can be modified at the same time, but they must be in different workspaces.
- D. The user interface pages are tightly connected to the model. You cannot add, delete, or reorder pages without affecting the model structure.

ANSWER: B C

Explanation:

“Configurator models are imported from items maintained in Oracle Fusion Product Hub (which is accessed by the Product Information Management work area) that have a Structure Type of Model. Only the optional structure and attributes of the product item are imported, because the required elements of the product item cannot be configured by an end user. The option classes and optional standard items for each model item are also imported.”“Configurator models are versioned objects. A model can go through multiple drafts before being released in a series of versions. There can be multiple drafts of the same model being modified at the same time, but they must be in different workspaces. A message notifies you if you add a model to a workspace when another draft exists in another workspace. There can only be a single released version of a model with the same effective start date.”

QUESTION NO: 10

Your company is using Order Management Cloud to capture orders, and has integrated with a legacy inventory application for order fulfillment. A fulfillment request needs to be aggregated and sent to an external inventory application.

What step would you perform to aggregate the request?

- A. Create a new custom task by using the Shipment Task Layer.
- B. Create a new custom task by using the Fulfillment Task Layer.
- C. Create a new custom task by using the Supply Task Layer.
- D. Configure a fulfillment task routing rule with aggregation criteria based on time limit or total number of lines.

ANSWER: D
